## PROFESSIONAL SUMMARY

Java Backend Developer with 1 year of hands-on experience building secure and scalable REST APIs using Spring Boot, Hibernate, and MySQL. Strong in authentication (JWT), API optimization, and backend architecture, with exposure to AI-based applications and microservice-ready design.

## TECHNICAL SKILLS

- **Languages:** Java, Python (Basic)
- **Backend:** Spring Boot, Spring MVC, Hibernate, JDBC
- **API Development:** REST APIs, Postman
- **Database:** MySQL
- **Security:** JWT, Spring Security
- **Tools:** Git, GitHub, Maven, Swagger, Flyway
- **Messaging:** RabbitMQ (Basic)
- **AI Tools:** OpenAI API, Gemini API
- **Deployment:** Docker (Basic)

## PROFESSIONAL EXPERIENCE

Java Backend Developer( Nov 2025 – Presente)
Narvee Technologies Pvt. Ltd.

### ATS (Application Tracking System)

**Tech Stack:** Spring Boot, PostgreSQL, Hibernate, Spring Security, JWT
**Summary:** A recruitment management platform that enables recruiters to manage consultants, vendors, job requirements, submissions, and candidate tracking through secure and scalable backend services.

- Developed backend modules for consultant management, vendor management, requirement tracking, and submission workflows.
- Designed and implemented RESTful APIs for requirement creation, consultant tagging, candidate submissions, and recruiter activities.
- Built advanced search, filtering, sorting, and pagination functionalities for requirements and consultant data.
- Developed dashboard and reporting APIs to provide real-time insights into requirements, submissions, and recruiter performance.
- Implemented JWT-based authentication and role-based access control for Admin, Recruiter, Team Lead, and Manager roles.
- Optimized complex PostgreSQL queries and database operations to improve application performance and reduce response time.
- Participated in debugging and resolving production issues while implementing business-driven enhancements.
- Collaborated with frontend developers, QA teams, and business stakeholders in Agile development cycles.
- Performed API testing and documentation using Postman and Swagger.

**Internship Experience**: Java Backend
Intern [July 2025 – Oct 2025]

**Zidio Connect (Job Portal Application)**
**Tech Stack:** Spring Boot, MySQL, JWT
**Summary:** A scalable job portal enabling students to apply for jobs and recruiters to manage postings with secure authentication and efficient backend architecture.

- Developed a scalable backend job portal connecting students and recruiters
- Designed and implemented **10+ RESTful APIs** for users, job postings, and applications
- Implemented **JWT-based authentication and RBAC** for Students and Recruiters
- Designed and optimized MySQL database schema
- Built job search and profile management features
- Improved API performance by **~30%** through backend optimization

**PROJECT:**
**RAG-Based AI Chat System**
**Tech Stack:** Spring Boot, Gemini API
**Summary:** An AI chatbot using Retrieval-Augmented Generation (RAG) to provide contextual responses based on resume data.

- Built a Retrieval-Augmented Generation (RAG) system
- Integrated Gemini API for contextual AI responses
- Implemented document chunking and retrieval logic

## EDUCATION

**Master of Computer Applications (MCA)**
Aurora's P.G. College | 2021 – 2023
GPA: 7.2

## STRENGTHS

- Problem Solving
- Quick Learner
- Communication
- Adaptability
- Time Management

## PERSONAL DETAILS

- **Languages:** English, Telugu
- **Location:** Hyderabad
